The valuable stone, so celebrated for its durability, colour, and texture, is well known, having been selected in preference to all others, by the Commissioners of Woods and Forests, for building the New Houses of Parliament. It is very superior for Monuments, Tombs, &c. &c.

W. WRIGHT and Co. deem it important to state the Anston Stone offered by them is from the same bed as that from which the New Houses of Parliament are being constructed, a fact alone being the opinion of the proprietors of the Duke of Leeds and W. Wright and Co.

Facilities are in hand for forwarding it to all parts of the kingdom.—Applications to be made to W. WRIGHT and Co., Anston, near Sheffield, Yorkshire.

Caen Stone is too well known to need special notice. STIRLING'S BELVEDERE SLATE WORKS, Belvedere-road, Lambeth.—A reduced list of prices of the best WELCH SLATE SLABS, planed both faces, will be sent on application (post paid) being made, and enclosing a postage stamp. The prices are under those advertised for inferior slates.

ENAMELLED SLATE.—CAUTION!—Some discarded workmen of Mr. Magnus's, having pirated his invention of marbling slate, and palmed upon the public trashy imitations, which unfortunately are frequently confounded with MAGNUS'S ENAMELLED SLATE, until a few months' wear has put them in their true light, Mr. MAGNUS, who has expended a fortune in perfecting and introducing his enamelled slate articles (which articles have won for him the patronage of the highest personages in the realm, the approbation and support of the first architects, and the medal of the Royal Society of Arts), deems it incumbent upon him for his own protection, and that of the public, and for the just fame of his invention, to caution the inexperienced against these imitations. The public are therefore requested to observe that the address is MAGNUS, PIMLICO SLATE WORKS, and in future all articles of his manufacture will be so marked.

Patronized by her Majesty Prince Albert, the Duke of Wellington, the Duchess of Sutherland, the Duchess of Gordon, the Marquis of Westminster, the Marquis of Londonderry, the Earl of Lenbugh, the Earl of Dartmouth, the Earl of Bandon, the Earl of Waldegrave, the Countess Wilton, Viscount Combermere, Lord Howard de Walden, the Bishop of London, the Bishop of Bath and Wells, the Hon. Col. Douglass Pennant, Mr. Ambrose Smith, Col. Challoner, Sir J. Easthope, Sir Francis Lawley, Sir Ralph Howard, the Hon. Capt. Dundonald, Sir W. Gordon, the Hon. C. Shaw Lefevre, and numerous others of the nobility and gentry of this and other countries, also the most eminent architects and surveyors, the engineers and directors of the principal lines of railway, the Board of Public Works, and by the public generally.

SLATE SLABS.—Mr. MAGNUS having machinery in Wales capable of sawing and planing some thousands of tons annually, is enabled to supply the public at a much lower rate than any other house not possessing the same facilities. Parties ordering large quantities will be allowed a considerable discount off the recently reduced price list.—Address, MAGNUS, Pimlico Slate Works.

SLAB SLATE.—Architects and builders are respectfully informed by the proprietors of the Llangollen Quarries, that they are now prepared to supply SLAB SLATE, of any size, and in any quantities without delay. They have opened out their quarries upon a large scale, and erected one of the largest mills and Water for the conversion of slate into any purpose for which it may be required. Their machinery for sawing, planing, and polishing being of the most powerful description, will enable them to supply slab slate in all forms, at moderate rates. The pavement of the Lyceum, the new Chester Railway station, is from their quarries, and they have just constructed new staircases to the boxes and pit, at the Adelphi Theatre. The stock can be inspected at their wharf in London.

CITY SAW-MILLS, Wenlock Basin, Regent's-canal, City-road.

NEW AND DURABLE PAVING FOR FOOTWAYS.

THE proprietors of the Llangollen Blue Flag Stone Quarry, invite the attention of Paving Commissioners, trustees, and Surveyors, to a NEW KIND OF SLATE, for the purposes of street footways, and to supply which, in London and the neighbourhood, they have formed a depôt at the undermentioned address. The quarry whence this slate is wrought, has only been opened extensively within the last two years, by the present proprietors, who have secured the exclusive right of raising and vending it, from the various landowners, through whose properties the vein extends. This slate has been worked for nearly a century for the county of the locality, and in the manner abundant proofs of its great durability have been accumulated. The stratification of it permits it to be wrought without blasting, and with a natural surface, or self face, that renders unnecessary all further operations, to the rough squares. The proprietors are thus enabled to sell it at a price which hitherto has been impossible from the ordinary trading slate quarries. There are no metallic specks, or nodules in this stone, so that it wears equally all over the surface. From the many experiments which have been made, it is well known that 3-inch slate is about equal to 6-inch York stone, and the proprietors are prepared to supply the 3-inch thick slabs, self-faced and squared, at the same price as 3-inch York stone. If, therefore, the durability of 3-inch York, in leading thoroughfares, be about twenty years, it is presumable that this Llangollen Stone will last at least twice as long, or forty years, without being removed. Specimens have been laid down in front of Messrs. Deberz and Co.'s Glass Warehouse, No. 64, Oxford-street; and also in Great St. Andrew-street, St. Giles's.

CITY SAW MILLS, Wenlock Basin, Regent's-canal, City-road.

To encourage the use of Plate Glass for glazing purposes, the price is considerably reduced, which will, for its durability and appearance, insure the preference to any other description.

It is admirably adapted for skylights, picture galleries, interior decorations, staircase windows, &c. It effects without obscuring the light, and has an equally good effect by lamp-light as by day. The pattern may be applied to any glass from 12 oz. to 32 oz. to the foot.
